DETAILED ACTION

This Action is in response to the communication filed on 4/3/08.

Claims 1-58 are currently pending and are addressed herein.

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1-39, 48-51, 54-58) in the reply filed on 4/3/08 is acknowledged.
2. Claims 40-47, 52, 53 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/3/08.
3. Claims 1-39, 48-51, 54-58 are examined herein.
4. It is noted that in order to aid the search of the claimed invention Applicants were asked to supply structure of the elected compound and, if possible, the chemical name of the elected compound (See page 10 of the Restriction requirement).
5. Applicants have not supplied either the structure or chemical name of the elected compound.
6. Applicants are again asked to supply structure of the elected compound and, if possible, the chemical name of the elected compound in order to aid in search and examination of the claimed invention.

Information Disclosure Statement

7. The information disclosure statement (IDS) submitted on 1/27/2004 is acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-39, 48-51, 54-58 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,670,468 (hereafter "the '468 patent"). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '468 patent are drawn to a method of making the instantly claimed oligonucleotide derivative. The method of making the oligonucleotide derivative would result in synthesis of the instantly claimed product. Therefore, the method of making the oligonucleotide derivative is not patentably distinct from the oligonucleotide derivative made by said process.

Conclusion

No claim is allowed.
